- Develop and manage server components to deploy high-performance applications.
- Create high-quality, clean, reusable code and implement storage solutions.
- Integrate server-side logic into user-facing components created by frontend developers.
- Create reports on projects and maintain documentation of the software development.

WORK HISTORY

WAILA TECHNOLOGY

DURATION: JUNE 2022 – TILL DATE

DESIGNATION: FULL STACK DEVELOPER

- Have created static website for THERMOZONE and FIELDSALE.
- Was part of team in developing the web application for HASHCHING using React Js , Node Js and AWS services.
- Have contributed for availing video call feature by integrating Twilio.
- Worked on payment gateway integration using Stripe.
- Proficient in designing DynamoDB data models that efficiently meet application requirements, optimizing read and write operations and also did Data Migration to DynamoDB and SQL basics.
- Was part of TRACK TASK project in creating our ticket tracking setup.
- Also was part of BROCKER PAY project in setting up auth APIs.

AGAPEWORKS

DURATION: NOVEMBER 2021 – MAY 2022

DESIGNATION: SOFTWARE DEVELOPER TRAINEE

- Was managing and maintaining the existing web application.
- Worked on demo projects for setting up client websites using HTML and CSS.
- Hands on experience on ASP.net core MVC.
- Worked on demo projects in design and development of websites using Javascript.

EDUCATIONAL QUALIFICATIONS

- Have completed BE\CSE in Rohini College of Engineering with 7.5CGPA.
- Have completed HSC and SSLC in LMPC school with 70%.

DECLARATION

I hereby declare the information furnished above is true, correct and complete to the best of my knowledge.
